

Kai Muenzer All-Day Hands-on Workshop at GBWG
Friday, May 3rd, 2019
1225 Wellington Street, Port Elgin

Turn a Box with tilted Lid

The demo will show how to turn a box with a ring that allows to hold a perfectly fitting tilted lid. We enhance the opening as a key element of a box. The curious observer is invited to open the tilted lid. We discuss

- The tilted lid issue and options
- Enhancing the opening as a key element of a turned box

The hands-on is a one-day class for students with some box turning experience. These boxes are a fun project with some excitement in the construction and lots of opportunity for embellishment.
