VOLUME: 10 ISSUE 11

DATE: NOVEMBER 2006

ELECTIONS

General Elections are Saturday November 18th 2006. We are still looking for members to volunteer for all positions.

Please come out and have your vote counted!!

The person the executive hoped to have demonstrate at this meeting would prefer to come in the Spring. As it is expected that the elections will not take too long, I am suggesting that members bring in anything they have made, for show and tell, that would be suitable as Christmas gifts, ornaments or decorations. This will give members at the meeting some ideas for preparing for this year's Christmas celebrations.

There is wood available at the club if members would like to try making, or demonstrating what is brought in.

DECEMBER MEETING

Do you want to do anything special for the December !!!

**Change date to accommodate the holiday season?
Bring in treats to have with Coffee?**

Bring in your ideas at November meeting for discussion and decisions.

MORE INFORMATION ON INTERMET

This is a follow up to the last meeting where we watched a great video explaining different sharpening techniques.

There is a Turning Web Site from the U.K. which has been set up to teach Turning and all that is needed in this regard. "Chapter Four" deals with Sharpening of Turning Tools.

WEB SITE:

www.turningtools.co.uk/wtintro/wtintro.html

This gets you right to the page on sharpening tools --- which includes the following:

Chapter 4: Sharpening tools

- 4.1 The grinder
- 4.2 The type of wheel
- 4.3 Dressing the wheel
- 4.4 Using the grinder
- 4.5 Overheating the tool
- 4.6 To hone or not to hone
- 4.7 Safety

NEWSLETTER UPDATE

If you find an article or information you feel would be beneficial to our members, please pass it on to the editor for insertion.

Perhaps you have completed a woodworking project at home and would like to share it with us. Just write up a short summary and add a couple of pictures. That's all there is to it!

I have a Kitchen reno completed, check below.

KITCHEN RENOVATIONS By: Lynn Day

I changed my kitchen cupboards and Centre Island by rebuilding the Cabinets I needed to fit in new locations; moved the sink and dishwasher from the Island; shortened the length of the Centre Island by 2 feet & added a book shelf for Cook Books; built a desk with a drawer near the phone; and put in new counters using 12" ceramic tiles and 2" stone of different varieties. I also put the Island on wheels so it can be moved around when necessary. I learned a lot completing this project and the Kitchen is much more efficient!
